

Death is a Sensitive Subject; Ensure You Can Make Appropriate Business Decisions

Simplicity offers deceased scrubs as part of our batch skip tracing product offerings. Using multiple databases, this product identifies deceased individuals so you can make the appropriate business decisions and ensure resources are allocated according to your internal strategies.

Expanded Coverage

We use multiple databases outside of just the Death Master File such as funeral homes, and proprietary databases of obituary and publisher records, providing you more comprehensive data points so you can better identify deceased consumers.

We Accept Files with or without SSNs

We understand that not everyone has access to Social Security Numbers (SSNs), so we have multiple versions of our product to allow for coverage in all situations.

Companies of All Sizes Now Have Access to Batch Processing

The integration between LocateSmarter and Simplicity makes batch skip tracing accessible to all companies regardless of volume or available IT resources.

To get started using deceased scrubs, contact Simplicity at 866-791-0224.
